To: Whom It May Concern

The Good Brew Kombucha Company prides itself on using the highest quality organic ingredients and the best quality water. For the past 2 years we have been brewing kombucha using Daylesford Spring Water that has gone through Kalyxx device and have noticed heightened growth of our probiotic blends. The complexity and microbial diversity of our living culture has been documented in a scientific paper (see <https://www.mdpi.com/2072-6643/13/12/4446>).

The Kalyxx device not only reduces scale and improves plant growth, it also enhances fermentation and the growth of probiotic bacteria and we will continue to use it as a 'secret sauce' in our probiotic blends.

Please feel free to contact me if you require any further information.
